

NEW!
The All-Rounder

MT-Alligator and MT-Alligator plus

Powerful solids feeding systems

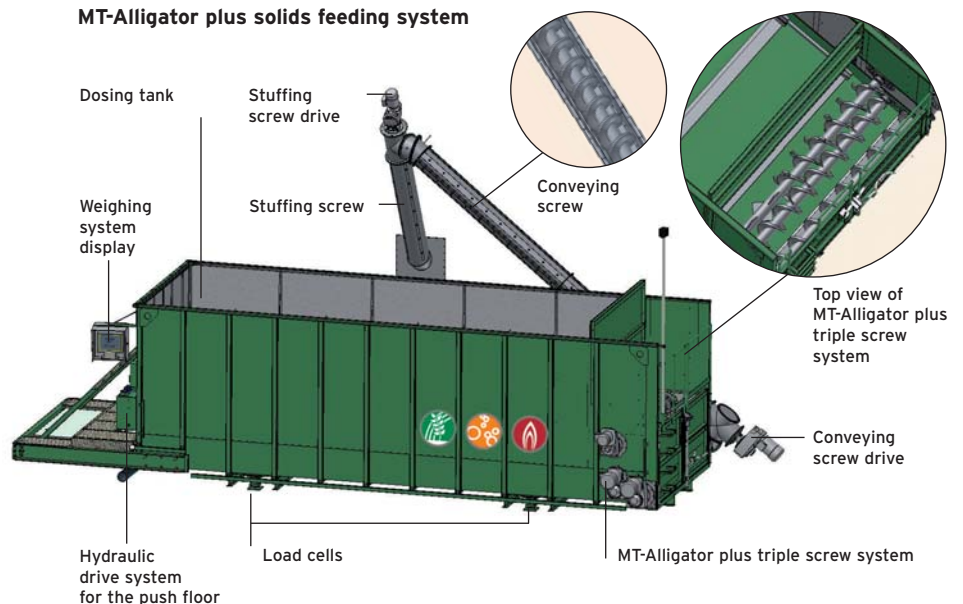

The advantages:

- Very high flexibility - processes a wide range of substrates
- Low filling height of the dosing tank with a larger total volume
- Sensor-monitored screws for a higher output capacity
- Low power consumption
- Full utilisation of the supply system volume
- Weighing of individual components (up to 20 components)
- High mechanical screw stability

The new MT-Alligator and MT-Alligator plus solids feeding systems enable the supply of difficult substrates into the biogas plant. In the dosing tank the solids are transported to the screws by a hydraulic, sensor-monitored push floor system.

The MT-Alligator is equipped with a double screw system and is therefore the ideal solution for substrates which are moderately difficult to convey. The MT-Alligator plus has a triple screw system and can therefore process substrates which are difficult to convey.

MT-Alligator plus solids feeding system

Available sizes:

- For a volume of 28 m³
- For a volume of 38 m³
- For a volume of 47 m³
- For a volume of 57 m³
- For a volume of 73 m³ (with top section)
- Special versions also available
